

Political Economy In Parliament: 1819-1823

The Fontana Economic History of Europe

Carlo M. Cipolla, General Editor

Vol. I: The Middle Ages

This new volume in an important series provides a detailed treatment of major trends of the medieval period: the growth of the population throughout Europe; a slow but steady growth in the pattern of economic development; the burgeoning of local trade and craftsmanship, and the development of long distance trade. Spring 1977. 400 pp. \$16.00

Vol. IV, Part 2: The Emergence of Industrial Societies

The book devotes a chapter to each of the four areas considered: Scandinavia, Russia, Switzerland and Spain. It isolates factors which influenced economic development between 1850 and 1914, such as population growth; the expansion of agriculture; industrial growth; transportation and communication. The final chapter suggests conclusions about the emergence of a Europe-centered world economy. Spring 1977. 470 pp. \$16.50

Political Economy in Parliament, 1819-1823

BARRY GORDON

Elucidates the various economic theories which dominated the turbulent period of industrialization after the Napoleonic wars. Much perspective is provided by a record of statements made in Parliament by the leading political figures on issues such as reform of the poor laws, corn laws and usury laws, and moves for greater freedom of trade. Spring 1977. 256 pp. \$21.50

Rural Planning Problems

GORDON E. CHERRY, ed.

A collection of seven specially commissioned essays reviews the range of contemporary rural problems. Some of the topics discussed are: the demographic structure of the rural population; internal problems of village communities; rural housing and unemployment; land use aspects of rural planning, and a conceptual framework for future rural planners. Winter 1976. 256 pp. \$19.50
