

Glossary: Water And Wastewater Control Engineering

GLOSSARY

Accessibility	Accessibility measures the relative ease with which one can reach desired destinations. See mobility.
Activity space	Geographic space within which a population tends to circulate.
Affected population	Population that would experience the beneficial and adverse effects of a transportation system change.
Air quality index (AQI)	An index for reporting daily air quality. It focuses on health effects due to breathing polluted air and includes five major pollutants: ground-level ozone, particulate matter, carbon monoxide, sulfur dioxide, and nitrogen dioxide.
American Association of State Highway Transportation Officials (AASHTO)	AASHTO is a nonprofit, nonpartisan association representing highway and transportation departments in the 50 states, the District of Columbia, and Puerto Rico.
American Society for Testing Methods (ASTM) International	Founded in 1898, ASTM International is a not-for-profit organization that provides a global forum for development and publication of voluntary consensus standards for materials, products, systems, and services.
ALOHA model	Areal Location of Hazardous Atmospheres (ALOHA) model.
Artist's sketches	A method of presenting alternative proposals for a transportation facility whereby respondents can react to renderings of aesthetic features.
Average annual daily traffic (AADT)	The average number of vehicles passing a point on a roadway per day based on an annual average of daily traffic rates. Actual daily traffic rates may vary somewhat from the AADT because of seasonal variations, special events, and other phenomena.
Barrier effect	The reduction in mobility and safety of nonmotorized travel caused by the construction of new transportation projects such as those that increase traffic volumes and speeds on existing roads.
